

CREWSAFE V100

Annual Recertification Service

Fully Inclusive and Standard options available

MOBILARM®

ALWAYS ON WATCH

Your Crewsafe V100 is designed and built to operate in the harshest marine environments, but annual servicing and recertification is highly recommended to ensure the effects of continuous use in such exposed conditions will not compromise the integrity of this lifesaving device.

By having your Crewsafe V100 inspected and recertified every 12 months, you will increase its life expectancy and most importantly, be confident that you and your crew can rely on it to perform exactly as it is designed to, when you need it most.

Which service is right for you?

■ Fully Inclusive

Provides insurance for replacement parts to save you money on repairs

» *Recommended if your units are in daily use or subject to extreme wear and tear*

■ Standard

You only pay for replacement parts as and when required

» *Ideal for units used occasionally or integrated with abandonment PFDs*

See over for more details

General inspection and recertification

The two service options below comprise the same thorough inspection and recertification of your Crewsafe V100 and the same turnaround times.

The **Fully Inclusive** service automatically covers the cost of all replacement parts and labour that may be required to recertify the unit for a further 12 months. If you choose the **Standard** service, any replacement parts and labour will be advised and quoted prior to repair and recertification.

Typical costs for replacement parts and labour are:

- » Battery replacement - \$175
- » Electronics replacement - \$225
- » Damaged case - \$135

	Service Type	
	Fully Inclusive	Standard
Turnaround Time ¹	5 days	5 days
Includes Replacement Parts Insurance	✓	✗
Replacement Parts Extra	✗	✓
Return Shipping Included ²	✓	✓
Annual Fee (per Unit, per Service)	\$195	\$115

¹ Turnaround time reflects the operational working days required to perform the inspection and recertification service and does not include weekends, public holidays or postal time each way. ² Inbound shipping payable by customer. All prices Australian Dollars (\$AUD).

All serviceable parts are inspected with every annual service. This includes full operation and performance checks of:

- » Battery
- » Arming switch
- » Antenna
- » Water sensors
- » DSC and VHF radio transmitters
- » GPS sensitivity and acquisition time
- » Strobe light and LED
- » Water tight seals

Each unit is thoroughly cleaned to remove any salt, grit or oil and pressure tested before receiving a Recertification Stamp, valid for 12 months.

Exclusions:

Products damaged by misuse, including dropping, crushing and exposure to corrosive chemicals and extremes of temperatures or water pressure.

Products requiring battery replacement due to emergency operation or by being tested beyond the recommended schedule. The Crewsafe V100 logs all operational and testing events and stores this information in non-volatile memory. These logs will be downloaded and analysed as part of the service thereby assisting service technicians to determine operating time, frequency of testing and other error messages.
