

Mobilarm Presents New VHF Life-Saving Device at Marine Safety Conference

Release date: **27 May 2008**

FOR GENERAL RELEASE

Adelaide, South Australia

Chief Executive Officer of Mobilarm, Mr Lindsay Lyon, will present the company's innovative marine safety technologies today at the Marine Safety Conference in Adelaide, South Australia, hosted by the National Marine Safety Committee.

The conference is attended by 300 delegates from within Australia's domestic maritime industry, including boat and ferry operators and managers, and those responsible for providing services and safety products to the marine industry. The conference covers top line speakers from Australia and overseas who will discuss new legislative, training and research topics which impact on this significant industry.

"The commercial marine workplace is a dangerous environment, with commercial fishing in particular having one of the highest industry death rates, second only to logging," said Mr Lyon.

"Man overboard events are the single largest cause of marine fatalities and traditional man overboard safety products have not met the needs of the commercial marine industry.

Mobilarm man overboard systems and the new Mobilarm V100 VPIRB provide a significant improvement to the safety of professional mariners and marine employees. The Marine Safety Conference allows us the opportunity to communicate this directly to the relevant people in industry and government and we are very proud to support the event.”

This year’s conference, run over three days at the Hilton Hotel, Adelaide, is the 5th National event of its type, and enables business and government leaders and government regulators to network, share ideas and gain new insights and perspectives.

Notes for editors:

Based in Perth, Western Australia, Mobilarm is the world leader in electronic marine safety products that protect and save lives in man overboard emergencies for commercial and recreational mariners. Available online and through a global network of dealers and distributors, Mobilarm's award-winning products are specifically designed to improve the workplace safety environment for all mariners, by providing an instant alert to vessel and crew in the event of man overboard.

The company's Australian and International awards include the Australian Design Award and the winner of the Seatrade Safety at Sea Award, the first such award given to an Australian company.
