

JOB VACANCY

Job Title	ELECTRICAL/ELECTRONIC INSTALLATION / TEST TECHNICIAN
Department	ENGINEERING
Reporting to	ENGINEERING MANAGER
Work Type	FULL- TIME
Location	PERTH, WESTERN AUSTRALIA

Key benefits

- Dynamic working environment
- Employee Options program participation
- Award-winning, innovative and market-leading technology

Overview

Headquartered in Perth, Western Australia, Mobilarm is one of the world's leading brands in electronic marine safety equipment that protect and save lives in the commercial marine workplace. Mobilarm delivers a range of crew monitoring systems, for use on vessels and in marine-based facilities, which generate automatic and immediate alerts in marine emergencies involving personnel, integrate with GPS and/or onboard navigation systems and provide in-water tracking of man overboard casualties in the water.

Mobilarm is developing a highly robust, safety critical, wireless sensor network for the purpose of detecting man overboard emergencies. We are seeking an Electrical/Electronic Technician, ideally with education and experience in electronic or navigation systems, for the installation, test and acceptance of our safety systems in commercial marine and offshore oil and gas industries.

Requirements:

- Commercial or military installation and testing skills, specific to electronic or navigation systems.
- Effective and pro-active communicator:
 - Installation and engineering teams
 - Partners and customers

POSTAL ADDRESS. PO BOX 1533 APPLECROSS WA 6953

OFFICE. 768 CANNING HIGHWAY APPLECROSS WESTERN AUSTRALIA

- Required disciplines and processes:
 - Adhere to the highest standards of safety and professional ethics
 - Ownership and management of multiple projects and tasks from start to finish
 - Commitment and accountability
 - Formal reporting and knowledge sharing, both written and oral
 - Application of technical ability and effective problem solving
 - Ability to quickly master and use new concepts, skills, methodologies and processes
 - Identify and contribute to product and workplace improvement - safety and quality

- Working environment:
 - Ability to create and maintain a safety-compliant work place
 - Produce installation methodologies, drawing from Mobilarm's engineering expertise and customer requirements
 - Produce installation plans
 - Plan, manage and implement installation and maintenance schedules
 - Create and coordinate acceptance testing

Desirable skills

- Experience with RF propagation
- Experience with wireless networking
- Creating and delivering training courses, in context to electrical/electronic installations
