

CREWSAFE V100

Compatible Lifejacket Range

Inflatable, SOLAS and aviation lifejackets
with integrated VHF DSC Maritime Survivor Locating Device

MOBILARM®

ALWAYS ON WATCH

Combining the detection, tracking and location capability of the Crewsafe V100 VHF DSC Maritime Survivor Locating Device with the superior inflation, buoyancy and overall comfort of leading lifejacket designs, makes the Crewsafe V100-compatible range of inflatable lifejackets ideal for commercial, industrial and abandonment use.

Your choice of lifejacket depends on the location and conditions in which you operate, but rest assured that all the featured models comply with the necessary regulations to suit your needs.

Consolidate your safety equipment and benefit from:

- » **Buoyancy and emergency alerting capability in one**
Best chance of survival and recovery in a man overboard event
- » **Automatic distress alert on submersion in water and/or auto-inflation of lifejacket**
Beacon is armed and locked in the READY position at all times
- » **Guaranteed optimal antenna position for GPS acquisition and VHF transmission**
Achieves maximum alerting range to transmit position coordinates to rescuers
- » **Fully enclosed beacon within lifejacket valise or pocket**
Beacon is protected and reduces snagging hazard
- » **No change to existing safety procedures**
Carry the Crewsafe V100 every time you wear your lifejacket

Choose a lifejacket to suit your needs

Mobilarm has partnered with the foremost international lifejacket manufacturers to bring you an integrated solution for man overboard safety and recovery. Integration of the Crewsafe V100 VHF DSC Maritime Survivor Locating Device with the following lifejackets requires the Crewsafe V100 Remote Water Sensing Extension Kit and Long Wire Embedded Antenna (model dependent). Speak to Mobilarm or your lifejacket supplier for more details.
